Annexes to support the policy and implementation	21

Policy statement

The Supporting Children and Young People with Medical Conditions in School Policy will provide guidance to ensure;

- **That Blessed Sacrament Catholic Primary School meets its statutory responsibilities to manage medicines and medical conditions in line with Government guidance ‘Supporting pupils at school with Medical conditions’ and the ‘Special Educational Needs and Disability code of practice: 0-25 years’.**
- **That we implement inclusive practices to support children and young people with medical conditions.**
- **That we aim to provide all pupils with all medical conditions the same opportunities as others at school.**

We will ensure the implementation of the Supporting Medical Conditions in School Policy to meet the following values and principles:

- All children/young people and staff stay healthy and stay safe
- Parents, children and young people feel secure and confident in the school’s ability to support their child.
- Pupils make a positive contribution and experience a wide and varied curriculum.
- All staff understand their duty of care to safeguard children and young people in all aspects of their needs and especially within the event of an emergency.
- All staff are appropriately trained, competent and confident in knowing what to do in an emergency.
- To continue to develop the school’s understanding that certain medical conditions are serious and can be potentially life threatening, particularly if ill managed or misunderstood.
- The school understands the importance of medication being taken as prescribed.
- All staff understand common medical conditions that affect children/young people at our school. Staff receive training on the impact medical conditions can have on children/young people from specialist medical staff.

The school's Governing body names Chair of Governors, Tony Gundersen to be responsible ensuring this policy is fully implemented and monitored regularly.

Policy

1. Blessed Sacrament Catholic Primary School is an inclusive community that aims to support and welcome all children and young people including those with medical conditions

- i. The governing body understands that it has a responsibility to make arrangements for supporting pupils with medical conditions who currently attend and to those who may attend in the future.
- ii. Pupils with medical conditions are encouraged to take control of their condition where appropriate. Pupils feel confident in the support they receive from the school to help them do this.
- iii. All children with medical conditions are provided the same opportunities at school as their peers.
- iv. The school aims to include all pupils with medical conditions in all school activities.
- v. The school ensures all staff understand their duty of care to children and young people in the event of an emergency.
- vi. Parents of pupils with medical conditions feel secure in the care their children receive both in school and on educational visits.
- vii. All staff are confident in knowing what to do in an emergency and receive regular training to do so.
- viii. There is knowledge that certain medical conditions are serious and can be potentially life-threatening.
- ix. All staff understand the common medical conditions¹ that can affect all children/young people in school. Staff receive training on the impact this can have on pupils.

¹ Common medical conditions include Asthma, Epilepsy, Diabetes and Anaphylaxis

2. Upholding the policy

All staff have a sound knowledge, understand their role and are trained to a level that fulfills and informs them in what to do to support children/young people with the most common serious medical conditions found at the school and how to uphold the policy

- i. All staff at the school are aware of the most common serious medical conditions which they may come across when children are in their care.
- ii. Staff understand their duty of care to pupils in the event of an emergency. In an emergency situation school staff are required under common law duty of care to act like any reasonably prudent parent. This may include administering medication.
- iii. All staff who work directly with pupils receive training and know what to do in an emergency for the pupils in their care with medical conditions.
- iv. Parents will be informed if their child has been unwell at school.
- v. The school uses the child/young person's Individual Healthcare Plan to inform the appropriate staff (including supply teachers and support staff) of pupils in their care who may need emergency help.
- vi. The school has procedures in place so that the most up to date/single master copy of the child/young person's Individual Healthcare Plan is sent to the emergency care setting with the pupil. On occasions when this is not possible, the form is sent (or the information on it is communicated) to the hospital as soon as possible.

The school has plans in place to cover staff absence and sickness if this impacts on an individual pupil's welfare.

Training should ensure staff are competent and have confidence in their ability to support pupils with medical conditions, the school may choose to arrange training and ensure this remains up-to-date.

The school recognises a first-aid certificate does not constitute as appropriate training for medical conditions.

Action for staff to take in an emergency for the common serious conditions at the school is displayed in prominent locations for all staff including classrooms, kitchens and the staff room.

The following roles and responsibilities are recommended practice within the policy. These roles are understood and communicated regularly.

Governing Body

The school's Governing body has a responsibility to:

- Uphold the Equality Act 2010 and make any reasonable adjustments.
- Ensure that arrangements are in place to support pupils with medical conditions (plans and suitable accommodation). In doing so they should ensure that such children can access and enjoy the same opportunities at school as any other child
- Take into account that some of the medical conditions that require support at school will affect quality of life and may be life-threatening and therefore focuses on the needs of the individual child/young person.
- Make sure the Supporting Medical Conditions in School Policy is effectively implemented, monitored and evaluated and updated in line with the school policy review timeline.
- Be aware that in some cases a flexible approach may be required, for example, programmes of study that rely on a part-time attendance in combination with Alternative Provision.
- Consider how the child/young person will be reintegrated back into school after periods of absence.
- Consider that children/young people with Medical conditions are entitled to full-time education and should not be denied admission, however, in line with Safeguarding duties ensure that no pupils' health is put at unnecessary risk.

- Ensure all parents are fully aware and understand their responsibilities (Annex H: Parent Guide).

Head teacher

The school's head teacher has a responsibility to:

- Ensure the school puts the policy into practice and develops detailed procedures.
- Liaise between parties concerned including child/young people, school staff, SENCO, pastoral support staff, teaching assistants, school nurses, parents, governors, the school health service, the Local Authority and local emergency care services and seek advice when necessary.
- Ensure all aspects of the policy are maintained.
- Ensure that information held by the school is accurate and up to date and that there are good information sharing systems in place incorporating all available documentation including a child's Individual Healthcare Plan.
- Ensure child/young person's confidentiality.
- Assess recommended training and support the development needs of staff.
- Ensure all supply teachers and new staff know the medical conditions policy.
- Delegate staff member(s) to maintain the school medical registers and to check the expiry date on medicines.
- Monitor and review the policy at least once a year, with input from children/young people, parents, staff and external stakeholders and update according to review recommendations and recent local and national guidance and legislation.
- In partnership with the parent have joint responsibility for the safe travel of the child/young person where necessary.
- Provide staff to cover absence.
- Make sure all staff are appropriately insured (See Section 8).

All school staff

All staff at the school have a responsibility to:

- Be aware of the potential triggers, signs and symptoms of common medical conditions and know what to do in an emergency by receiving awareness training.
- Be aware that medical conditions can affect a child/young person's learning and provide extra help when child/young people need it.
- Understand the policy and how this impacts on children and young person's education.
- Know which children/young people in their care have a medical condition and be familiar with the content of the child/young person's Individual Healthcare Plan.
- Allow the child/young person to have immediate access to their emergency medication where appropriate.
- Maintain effective communication with parents including informing them if their child has been unwell at school.
- Be aware of child/young people with medical conditions who may need extra social support.
- Understand the common medical conditions and the impact it can have on children/young people.
- Ensure all child/young people with medical conditions are not excluded unnecessarily from activities they wish to take part in.
- Ensure children/young people have the appropriate medication or food with them during any exercise and are allowed to take it when needed.

First aiders

First aiders at the school have a responsibility to:

- Give immediate help to casualties with common injuries or illnesses and those arising from specific hazards with the school.
- When necessary ensure that an ambulance or other professional medical help is called.

Special Educational Needs Coordinators (SENCO)/Inclusion Managers

The SENCO/Inclusion Managers at the school have responsibility to:

- Help update the school's medical condition policy.
- Know which children/young people have a medical condition and which have special educational needs because of their condition.
- Be the key member or liaise with other staff to ensure children/young people with medical conditions continue to make expected progress.
- Ensure teachers make the necessary arrangements and make reasonable

- adjustments if a child/young person needs special consideration or access arrangements in exams or course work.
- Ensure if a child has a statement or EHC Plan their medical conditions are linked and become a part of this statutory document.

Pastoral support staff/Learning Mentors

The pastoral support staff at the school have the responsibility to:

- Help update the school's medical conditions policy.
- Know which children/young people have a medical condition and which have special educational needs because of their condition.
- Monitor children/young people's attendance and punctuality and consider additional support and planning with the SENCO.
- Ensure all children/young people with medical conditions are not excluded unnecessarily from activities they wish to take part in.

•

Transport staff

The transport staff working with the child/young person and their family has a responsibility to:

- to have up to date knowledge of conditions and symptoms and receive quality assured training.
- inform the LAs Transport Team when annual leave is planned through their line manager.
- use transport healthcare plans for children/young people with life-threatening conditions.

Health Services

The School Nurse and others from the local Health Community and services who work with the school has a responsibility to:

- Co-operate with schools to support children/young people with a medical condition.
- Be aware of the needs and training the school staff need in managing the most common medical conditions at school and support when appropriate
- Provide information about where the school can access other specialist training or alternative provide training if this has been locally developed.

Other healthcare professionals, including GPs and paediatricians have responsibility to:

- Notify the school nurse when a child has been identified as having a medical condition that will require support at school.
- Provide advice on developing healthcare plans.
- Consider that specialist local health teams may be able to provide support in schools for children with particular conditions (e.g. asthma, diabetes, epilepsy).

Parents/Carers

The parents of a child/young person at the school have a responsibility to:

- Tell the school if their child has a medical condition.
- Provide relevant information to ensure the school has a complete and up-to-date Individual Healthcare Plan for their child.
- Inform the school about the medication their child requires during school hours.
- Inform the school of any medication their child requires while taking part in educational visits or residential visits, especially when these include overnight stays.
- Tell the school about any changes to their child's medication, what they take, when, and how much.
- Inform the school of any changes to their child's condition.
- Ensure their child's medication and medical devices are labelled with their child's full name and date of birth and where possible, a spare is provided with the same information.
- Ensure that their child's medication is within expiry dates.
- Inform the school if their child is feeling unwell.
- Ensure their child catches up on any school work they have missed.
- Ensure their child has regular reviews about their condition with their doctor or specialist healthcare professional and information that will require the school to support the child is passed on.
- Ensure (where/if) appropriate their child has a written care/self-management plan from their doctor or specialist healthcare professional to help their child manage their condition.

3. All staff understand and trained in the school's general emergency procedures

- i. The school has a general Health and Safety Policy that includes risk assessments and has arrangements in place to deal with emergencies.
- ii. All staff know what action to take in the event of a medical emergency. This includes:
 - How to contact emergency services and what information to give (Annex F: Contacting the Emergency Services)
 - Who to contact within the school.
- iii. Action to take in a general medical emergency is displayed in prominent locations for staff. These include classrooms, the staff room, food preparation areas and sporting facilities.

- iv. If a child/young person needs to be taken to hospital, a member of staff will always accompany them and will stay with them until a parent arrives. The school tries to ensure that the staff member will be one the child knows.
- v. Staff should not take child/young people to hospital in their own car if it is safer to call an ambulance

4. The school has clear guidance on the administration of medication at school and what is deemed as unacceptable practice

Administration - general

- i. The school understands the importance of medication being taken as prescribed.
- ii. All staff are aware that there is no legal or contractual duty for any member of staff to administer medication or supervise a child/young person taking medication unless they have been specifically contracted to do so.
- iii. All use of medication defined as a controlled drug, even if the child/young person can administer the medication themselves, is done under the supervision of a named member of staff at this school.
- iv. If a trained member of staff, who is usually responsible for administering medication, is not available the school makes alternative arrangements to continue to provide this support.
- v. For medication where no specific training is necessary, other members of staff may administer prescribed and non-prescribed medication to children/young people under the age of 16 but only with the written consent of their parents.
- vi. Training is given to all staff members who agree to administer medication to pupils, where specific training is needed. The local authority provides full indemnity.
- vii. Parents at this school understand that if their child's medication changes or is discontinued, or the dose or administration method changes, that they should notify the school immediately.
- viii. If a child/young person at this school refuses their medication, staff should not force them and record this and follow procedures set out in the Individual Healthcare Plan. Parents are informed as soon as possible.

- ix. If a child/young person misuses medication, either their own or another child/young person's, their parents are informed as soon as possible. These child/young person are subject to the school's usual disciplinary procedures.
(There are several members of staff at this school who have been specifically trained to administer medication/specific care and have received the relevant and suitable training from healthcare professionals.)

Administration – Emergency Medication

- x. All children/young people with medical conditions has easy access to their medication (if appropriate).
- xi. All child/young people are encouraged to carry and administer their own emergency medication, only when their parents and health professionals determine they are able to begin taking responsibility. All child/young people carry their medication with them at all times, except if they are controlled drugs as defined in the Misuse of Drugs Act 1971. This is also the arrangement on any off-site or residential visits.
- xii. A child/young person who does not carry and administer their own medication know where their medication is stored and how to access it.
- xiii. Children/young people who do not carry and administer their own medication understand the arrangements for a member of staff (and the secondary member of staff) to assist in helping them take their medication safely.

Unacceptable Practice

- xiv. The school uses its discretion and professional judgment on individual cases but it is not generally acceptable practice to:
- prevent a child/young person from easily accessing their medication or inhalers when or where necessary.
 - assume that every child with the same condition requires similar or the same support.
 - ignore the views of the child/young person and their parents
 - send children/young people home frequently or prevent them from staying for school activities.
 - send a child unaccompanied to the school office or medical room if they become ill.
 - penalise their attendance records if their absences are related to their medical condition e.g. hospital appointments.
 -

See Attendance Policy for further clarification

- prevent pupils from drinking, eating or taking toilet or other breaks in order to effectively manage their own medical condition.
- require parents or make them feel obliged to attend school to administer medication or provide medical support.
- prevent or create unnecessary barriers to children participating in any aspect of their educational experience, this includes school visits, e.g. requiring the parents to accompany the child

5. The school has clear guidance keeping clear and up to date records which supports the planning and access to school

Administration/Admission forms

- i. Parents at this school are asked if their child has any health conditions or health issues on the admission form, which is filled out at the start of each school year. Parents of new pupils starting at other times during the year are also asked to provide this information on admission forms.

School Medical register

- ii. Individual Healthcare Plans are one document that is used to create a Medical register of pupils with medical needs, not all children/young people with medical conditions will need an individual plan. Identified members of staff have responsibility for the medical registers at school. These are Mrs Emma Crist, Mrs Helen Riley, Mrs Marie McCormack and Miss Alison Wagg.
- iii. The identified members of staff have responsibility for the medical registers and follows up with the parents any further details on a child/young person's Individual Healthcare Plan required or if permission for administration of medication is unclear or incomplete.

Individual Healthcare Plans

Drawing up Individual Healthcare Plans (IHP)

- iv. An individual Healthcare plan should be drawn up with the input of parents, healthcare professionals, school designated staff and where possible the child e.g. Specialist Nurse Teams, School Nurse etc. It may be initiated by a member of staff. The level of detail in the plan will depend on the complexity of the condition and the degree of support required.
- v. As a sign of good practice the school will use Individual Healthcare Plans to record important details about individual children's medical needs at school, their triggers, signs, symptoms, medication and other treatments and used to identify the level support they need. Further documentation can be attached to the Individual Healthcare Plan if required (use of Annex A).

vi. An Individual Healthcare Plan, accompanied by an explanation of why

and how it is used, is sent to all parents of pupils with a long-term medical condition. This is sent:

- at the start of the school year
 - at admission
 - when a diagnosis is first communicated to the school.
- vii. If a child/young person has a short-term medical condition that requires medication during school hours, a medication form plus explanation is sent to the pupil's parents to complete (Annex C: Record of medicine administered to an individual child).

Ongoing communication and review of the Individual Healthcare Plan

- viii. Parents at this school are regularly reminded to update their child's Individual Healthcare Plan if their child has a medical emergency or if there have been changes to their symptoms (getting better or worse), or their medication, treatments or conditions change.
- ix. Staff at this school use opportunities to invite parents to review and check that information held by the school on a child/young person's condition is accurate and up to date.
- x. Every child/young person with an Individual Healthcare Plan at this school has their plan discussed and reviewed at least once a year.
- xi. Where the child has SEND, the Individual Healthcare Plan should be as part of the graduated approach of Assess, Plan, Do, Review and/or linked to their statement or Education Health and Care Plan if they have one.

Storage and access to Individual Healthcare Plans

- xii. The school ensures that all staff protect confidentiality.
- xiii. Individual Healthcare Plans are kept in a secure central location at school or attached as linked documents using the school's computer system.
- xiv. Apart from the central copy, specified members of staff (agreed by the pupil and parents) securely hold copies of Individual Healthcare Plans. These copies are updated at the same time as the central copy.
- xv. All members of staff who work with groups of children/young people will

access key details from the IHP as relevant, to provide support with their planning of teaching and learning.

- xvi. When a member of staff is new to a pupil group, for example due to staff absence, the school makes sure that they are made aware of (and have access to) the Individual Healthcare Plans of children/young people in their care.
- xvii. The school seeks permission from parents to allow the Individual Healthcare Plan to be sent ahead to emergency care staff, should an emergency happen during school hours or at a school activity outside the normal school day. This permission is included on the Individual Healthcare Plan.

Use of an Individual Healthcare Plan

- xviii. Individual Healthcare Plans are used by the school to:
 - inform the appropriate staff and supply teachers about the individual needs of children/young people with a medical condition in their care
 - identify common or important individual triggers for children/young people with medical conditions at school that bring on symptoms and can cause emergencies. The school uses this information to help reduce the impact of common triggers
 - ensure that all medication stored at school is within the expiry date
 - ensure this school's local emergency care services have a timely and accurate summary of a pupil's current medical management and healthcare in the event of an emergency
 - remind parents of a child/young person with medical conditions to ensure that any medication kept at school for their child is within its expiry dates. This includes spare medication.

Consent to administer medicines

- xix. If a child/young person requires regular prescribed or non-prescribed medication at school, parents are asked to provide consent, giving the pupil or staff permission to administer medication on a regular/daily basis, if required
- xx. All parents of children/young people with a medical condition who may require medication in an emergency are asked to provide consent on the Individual Healthcare Plan for staff to administer medication.
- xxi. If a child/young person requires regular/daily help in administering their medication then the school outlines the school's agreement to

administer this medication on the Individual Healthcare Plan (if one is in place) . The school and parents keep a copy of this agreement. (Annex B: Parental Agreement for a setting to administer medicine)

Off-site, Sporting Activities and Residential visits

Parents are sent a residential visit form to be completed and returned to school shortly before their child leaves for an overnight or extended day visit. This form requests up-to-date information about the child/young person's current condition and their overall health. This provides essential and up-to-date information to relevant staff and school supervisors to help children/young people manage their condition while they are away. This includes information about medication not normally taken during school hours.

- xxii. When attending a residential visit or off-site activity (including sporting events) the lead staff member will have copies of all visit paperwork including risk assessments for children/young people where medication is required. A copy of the Individual Healthcare Plan's will accompany the child/young person if necessary and reference should be made to any medical conditions in the planning and risk assessment prior to the visit taking place. This should also include details of any medication usually administered at home.
- xxiii. All parents of a child/young person with a medical condition attending a off-site activity or overnight residential are asked for written consent, giving staff permission to administer medication if required and an Individual Healthcare plan has not been drawn up.
- xxiv. The residential visit form also details what medication and what dose the pupil is currently taking at different times of the day. It helps to provide up-to-date information to relevant staff and supervisors to help the pupil manage their condition while they are away.

Other record keeping

- xxv. The school keeps an accurate record of each occasion an individual pupil is given or supervised taking medication. Details of the supervising staff member, pupil, dose, date and time are recorded. If a pupil refuses to have medication administered, this is also recorded and parents are informed as soon as possible (Annex C: Record of medication administered to an individual child).

- xxvi. The school holds training on common medical conditions once a year. A log of the medical condition training is kept by the school and reviewed every 12 months to ensure all new staff receive training.
- xxvii. All school staff who are designated to administer specific or regular medication are provided with training by a healthcare professional. The school keeps a record of staff who have had training.

Transitional Arrangements

Arrangements should be in place between schools and for the start of the relevant school term

School is not required to wait for a formal diagnosis before providing support but does require the parent to share all information relating to their child's medical needs. This should be later supported by the healthcare professionals.

6. There is clear guidance on the safe storage and handling of medication at school

Safe storage - emergency medication

- i. Emergency medication is readily available to children/young people who require it at all times during the school day or at off-site activities. If the emergency medication is a controlled drug and needs to be locked up, the keys are readily available and not held personally by members of staff.
- ii. Where the child's healthcare professional or school deems that they are not yet able or old enough to self-manage and carry their own emergency medication, they know exactly where to access their emergency medication and which member of staff they see.

Safe storage - non-emergency medication

- iii. All non-emergency medication is kept in a secure place, in a lockable cupboard in a cool dry place. Pupils with medical conditions know where their medication is stored and how to access it.
- iv. Staff ensure that medication is only accessible to those for whom it is prescribed.

Safe storage - general

- v. There is an identified member of staff who ensures the correct storage of medication at school.
- vi. All controlled drugs are kept in a locked cupboard and only named staff have access, even if the child/young person normally administers medication themselves. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenalin pens should be always readily available and not locked away.
- vii. It is the parent's responsibility to ensure new and in date medication comes into school on the first day of the new academic year.
- viii. Three times a year (prior to the Parents' Meetings in Autumn and Spring term and at the end of Summer term the designated members of staff checks the expiry dates for all medication stored at school.
- ix. The identified member of staff, along with the parents of children/young

people with medical conditions, will ensure that all emergency and non-emergency medication brought in to school is clearly labelled with the pupil's name, the name and dose of the medication and the frequency of dose. This includes all medication that pupils carry themselves.

- x. All medication is supplied and stored in its original containers/packages. All medication is labelled with the child/young person's name, date of birth, the name of the medication, expiry date and the prescriber's instructions for administration, including dose and frequency.
- xi. Medication will be stored in accordance with instructions, paying particular note to temperature. In the Infant building this is in the First Aid Room, in the Junior building this is within the First Aid area in Phase 3 corridor.
- xii. Some medication for pupils at this school may need to be refrigerated. All refrigerated medication is stored in an airtight container and is clearly labelled. Refrigerators used for the storage of medication are in a secure area that is only accessible to staff or the refrigerator itself is locked.
- xiii. All medication is sent home with pupils at the end of the school year. Medication is not stored in summer holidays.

Safe disposal

- xiv. Parents will be asked to collect out-of-date medication.
- xv. If parents do not pick up out-of-date medication, or at the end of the
- xvi. Staff will check the dates of medication at the end of each term and will arrange for the disposal of any that have expired.
- xvii. At the end of the school year, medication is taken to a local pharmacy for safe disposal.
- xviii. The designated staff who are responsible for checking the dates of medication will arrange for the disposal of any that have expired.
- xix. Sharps boxes are used for the disposal of needles. Parents obtain sharps boxes from the child's GP or paediatrician on prescription. All sharps boxes in school are stored in a locked cupboard unless alternative safe and secure arrangements are put in place on a case-by-case basis. Arrangements should be made for their safe disposal.

- xx. If a sharps box is needed on an off-site or residential visit a named member of staff is responsible for its safe storage and return it to school or the child/young person's parent.

7. Supporting Medical Conditions in school policy is regularly reviewed, evaluated, consulted with stakeholders and updated.

- i. The policy is reviewed, evaluated and updated annually in line with the school's policy review timeline and receives a full consultation with stakeholders.
- ii. Any new government guidance is actively sought and fed into the review, guidance will be provided by Local Authority Officers.
- iii. When evaluating the policy, the school seeks feedback and further
- iv. consultation on the effectiveness and acceptability of the medical conditions policy with a wide-range of key stakeholders within the school, health settings and with parents and children/young people.

Key stakeholders include:

- Children/young people
- Parents
- School nurse and/or school healthcare professionals
- Headteacher
- Teachers
- Special Educational Needs Coordinator (SENCO)
- Pastoral support staff
- First aider
- All other school staff
- Local emergency care service staff (including accident & emergency and ambulance staff)
- Local health professionals
- The school employer
- School governors

All key stakeholders should be consulted in two phases:

- initial consultation during development of the policy.
 - comments on a draft policy before publication and implementation.
- v. The views of children/young people with various medical conditions are actively sought and considered central to the evaluation process.
 - vi. Parents, school staff, governors, relevant local health staff and any other external stakeholders are informed and regularly reminded about the policy and how they impact on its implementation and review.

8. Liability and Indemnity

- i. The school has an appropriate level of insurance and reflects the level of risk associated with supporting medical conditions.
- ii. The school recognises that the insurance policy should provide liability cover relating to administration of medication.
- iii. Individual cover may need to be arranged and any requirements of the insurance policy, such as staff training, will be complied with.

9. Complaints Procedure

- a. If parents or carers have concerns or are dissatisfied with the support provided they should directly contact the school and follow the complaint procedure set by the school.

All documentation should be completed in pen or held as an e-copy.

Legislation and Guidance

This policy and guidance has been compiled using recommended government documents and Acts, these include;

Relevant Legislation

Children and Families Act 2014 – Part 5: 100

Education Act 1996

Health and Safety at work Act 1974

Health and Safety: advice for schools – June 2014

Medicines Act 1968

Misuse of Drugs Act 1971

Regulation 5 of the School Premises (England) Regulation 2012 (as amended)

Special Educational Needs and Disability Code of Practice: 0-25 years

Supporting pupils with Medical Conditions – December 2015

The management of Health and Safety at work regulations 1999

The Local Authority will provide both national and local guidance.

Annex G:

Dear Parent

Thank you for informing us of your child's medical condition. I enclose a copy of a guide of your responsibilities and the full policy for supporting pupils at school with medical conditions which can be found on the school website.

An individual healthcare plan now has to be prepared/reviewed. This will set out what support your child needs and how this will be provided. We will develop this plan with you, your child and the healthcare professionals who can advise us on your child's medical case.

We would like to hold a meeting to start developing the plan on xx/xx/xx. Please can you contact us to let us know if this convenient and to agree who needs to attend or provide information for the meeting.

To confirm your attendance or if you would like to discuss this further please call me on 0151 525 9600 or ask to speak to me in school.

Yours sincerely

Annex H: Parent Guide

The school will support your child with their medical needs but to do this we ask that you;

- tell us if your child has a medical condition
- work with us to ensure your child has a complete and up-to-date Healthcare Plan if necessary
- inform us about the medication your child requires during school hours
- inform us of any medication your child requires while taking part in educational visits or residential visits, especially when these include overnight stays
- tell us about any changes to your child's medication, what they take, when, and how much
- inform us of any changes to your child's condition
- ensure your child's medication and medical devices are labelled with their full name and date of birth and a supply a spare (if necessary) provided with the same information
- ensure that your child's medication is within expiry dates
- inform us if your child is feeling unwell
- ensure your child catches up on any school work they have missed
- ensure your child has regular reviews about their condition with their doctor or specialist healthcare professional and information that will require us to support your child is passed on ASAP
- Ensure your child has a written care/self-management plan if necessary or relevant from their doctor or specialist healthcare professional to help the child manage their condition.

Annex I: Quick Guide for schools

Storage and Access

- All non-emergency medication is kept in a secure place and controlled drugs are kept in a locked cupboard and only named staff have access.
- All pupils with medical conditions have easy access to their medication.

Administering any Medication

- The members of staff at the school who have been specifically contracted to administer medication are:
 - Gaynor Holmes
 - Marie McCormick
 - Helen Riley
- If a trained member of staff, who is usually responsible for administering medication, is not available the school makes alternative arrangements to continue to provide this support.
- For medication where no specific training is necessary, any member of staff may administer prescribed and non-prescribed medication to children/young people under the age of 16, but only with the written consent of their parent.

Record Keeping

- All medications that are administered should be recorded with the date, child's name, time, name of medicine, dose given, any reactions, signature and print name of supervising staff member.
- Staff will follow the guidance within the individual healthcare plan and follow the instructions found on the prescribed medication.
- Only supply medication to children/young people where written consent has been received but all staff need to act as any reasonably prudent parent.
